

Quacks of Quedlinburg

Packing instructions:

1: Put loose cards, in top section making a flat base.

2: Add White player box. This box has 6 sections place the starting pieces for each player in each section, with the last section for spare parts and dice. Also put the red crystals box sideways on next to the player pieces box.

3: Add all the coloured tiles into there correct coloured box, note: some have three sections for the different values, 1,2,4 etc.

4: Now add the game board and players boards, which you fit snugly against the player pieces.

5: Finally put in the black bags, now its all ready for your next game.

Please note, the boxes are new and stiff, the catches that keep them shut are at the sides, not the front, therefore open them by levering at the front sides, not the middle.

FYI

This set took a 3d printer 166 hours to print, the material is made from purely organic material and will decompose naturally leaving no trace or any harm to the environment. The material actually comes from corn would you believe.

We are printing all kinds of game accessory sets, if you have any more games you would like accessories for then please send me a message and I will prioritise.
